

Yacht Interior's Files Validator DLC

Do you like the yachts from GTA Online?

If besides to like the yachts from GTA Online, you, so like us, mess with map constructions on the game, including the yacht, imagine to construct a yacht over the sea, with all interiors placements!

WARNING!

You're not allowed to reupload this mod. Any improvements, or modifications added to it must be notified to our email address: thiagoandradevitoria@live.com, and any permission request must be sent through it too.

We're having trouble to do the collision component work on the game. When we gonna construct a specific yacht, and add the collision component. When we run the game to do the text, the component doesn't works, and if in a ymap, the game crashes.

We're working to fix this problem. If you can help us fixing this problem, please send a email to us through the email address above..

Unfortunately it's not possible, because these props are blocked at the game.

Looking this, we've created this little DLC that will allow you, and everyone that likes the yacht to build a yacht with a complete cabin, like these images shows.

To unlock all props from the yacht's cabin, you just need install this DLC on your "mods" folder on the game, open the txt file "Yacht Interiors PropList for Menyoo", select all prop list, copy and paste on menyoo's proplist file, to spawn them into the game.

Installation:

Extract the the folder "yacht_interior" to the "mods" folder on your game's directory.

You gonna have to do just like that: Go to Grand Theft Auto
V\mods\update\x64\dlcpacks\.

Drag and drop the yacht_interior folder just at this location on the game.

After done this, goto Grand Theft Auto V\mods\update\update.rpf\common\data, and in Edit Mode click with right button from the mouse over the dlclist.xml and then, click in Edit.

So add this line: **<Item>dlcpacks:yacht_interior</Item>**.

After do this, open the txt file "Yacht Interiors PropList for Menyoo", select all prop list and copy them.

Do not close the file yet!

You need have [Menyoo PC Single-Player Trainer](#) installed on your GTA V.

If you do not have it yet, you can download it just clicking on the link above.

After downloaded and installed the Menyoo on your GTA V, go to GTA V\menyoostuff, look and open the txt file "PropList" and so, paste the list referent to the itens from our dlc.

Please don't delete the original itens from menyoo PropList, just add the new itens to it.

After done all, run the game, open the Menyoo pressing F8, and in Object Spawner, look for the components.

You can search them, or spawn them by the model name.

This is it.

Enjoy!
