

## Toyota FJ 2023

The vehicle was designed as an exact copy of all the specifications of the Kingdom of Saudi Arabia, with the smallest available details, and the work was completed after 3 continuous months.

Additional details have been added that can be activated through the Extra, such as turning on the orange lights, as well as stickers around the vehicle, as well as the spare tire.

This is the first version and we aspire in the future to add some improvements depending on your opinions through Discord.
