

CHICAGO POLICE

This is my very first conversion ever to GTA V – and I'm proud to bring you a classic:

"The 1999 Ford Mustang Police Car has what it takes to get rough and personal with the most wily opponents."

Straight out of Midtown Madness 1, this vehicle is available in two versions:

Police version – with lights and sirens ready to chase!

Civilian version – clean and classic street muscle.

I recreated the feel of the original game's handling, giving it that arcade-style, fast-turning, kart-like driving – just like you remember from MM1.

GTA V Mod: 1999 Ford Mustang – MM1 Conversion

Installation

Add the folder to your dlcpacks.

Edit your dlclist.xml to include the line:

```
xml
Copy
Edit
<Item>dlcpacks:/midtownmadness/</Item>
Spawn the vehicle with its spawn name:
```

Police: vpcop

Civilian: vpmustang

Credits

Original model and concept from Midtown Madness 1.

Conversion, tuning and handling: Ido (this is my first ever mod – feedback is welcome!).

Notes

Handling mimics the MM1 physics: quick turns, lightweight feel, arcade-style traction.

Lights and sirens work with standard GTA siren system.

Modeled for fun, not realism.

Author: Ido
Version: 1.0
Game: Grand Theft Auto V
Original Game: Midtown Madness 1
