

IMPROVED VAPID SPEEDO

This is a modified version of the default Speedo with several quality of life improvements implemented into the vehicle. It has functional side doors and the front badge's position has been restored to be similar to the IV and early V versions. There are three versions of the improved Speedo: Liveryless version, this replaces the original Speedo model, perfect for compatibility with the Story Mode, the livery version with 13 available liveries and piles of boxes inside its interior, and the passenger version with 6 available liveries, the latter two are add-on models.

There are livery and color combinations defined on each livery for the livery and passenger versions. There are also several spawn points for the Speedo variants, they can be found at the appropriate locations.

REQUIREMENTS:

- **Gameconfig by Dilapidated:**

INSTRUCTIONS:

- **Run OpenIV, click on “Edit Mode” and make sure you have installed one of the modified *gameconfig.xml* listed above in case you do not have any previously installed. This way your game will be able to handle add-on vehicles properly and it will not crash during loading;**
- **Run the “improvedspeedo” OIV package installer to automatically register the *.meta* changes to the base game files and wait until the process is done;**
- **After following these steps, launch the game and enjoy.**

KNOWN ISSUE: The color and livery combinations will not work properly if the vehicle is spawned by any trainer besides [Simple Trainer](#) and [Menyoo](#). In order to get the combinations to work properly, you may need to install either of the aforementioned trainers or find them spawn naturally on traffics.

CHANGELOG:

1.0 – Initial release

1.1 – Fixed an interior issue on the passenger version

1.2 – Changed the installation method using the OpenIV Package Installer
