

# IMPROVED MTL FIRE TRUCK

This mod adds a full vehicle mapping template to the original Fire Truck, there are 2 liveries for the vehicle, which resulted due to the split of the vanilla LSFD livery into LSFD and LSCoFD, while still staying consistent to the canon. The Fire Truck has also been modified to include a better grill and a pair of functional foglights on the front bumper.

## INSTRUCTIONS:

- Run the “improvedfiretruck” OIV package installer to automatically register the *.meta* changes to the base game files and wait until the process is done;
- After following these steps, launch the game and enjoy.

## OPTIONAL INSTRUCTIONS (VANILLA LSFD LIVERY):

To make the Fire Truck have the vanilla LSFD livery, it is necessary to have the vehicle texture manually replaced with an alternative version included in the installation files:

- Replace the livery inside the *firetruk.ytd* located in `x64/dlcpacks/sp_firetruck/dlc.rpf/x64/levels/gta5/vehicles/vehicles.rpf` with the **“VANILLA FILE”** livery from the **“Vanilla LSFD Livery”** folder.
