

THE SECURITY PACK

This pack consists of lore-friendly security-themed improved vanilla vehicles fitted with equipment and liveries mostly based on canon designs while aiming at variety and uniqueness.

Gruppe Sechs, the ever-expanding security conglomerate behemoth established all over the country for many years; Bobcat Security, a thriving Midwestern company defying the security oligopoly in the West Coast; Merryweather Security Armed Response, do not confuse them with the nefarious Merryweather private military contractor as these are just their ordinary residential and commercial security branch bringing whatever you can always expect from a regular security company; and the SecuroServ Mall Security division, the least shady arm of the questionable VIP security services provider filling the commercial districts with wannabe cops, had their vanilla fleets expanded and brand-new guard NPCs added to the roster: covering from high-value armored transport vehicles to small patrol carts and respective uniforms for each company.

Also two private security companies from GTA Vice City and San Andreas make a return in this pack to please the nostalgic players: Lock & Load Security, an all-American company struggling to keep itself afloat in the cash-in-transit business; and Chuff Security Co., a foreign security company trying to bite a share of the high-value transportation market (according to the authors' headcanon and design choices).

Expect to find these fresh additions naturally spawning all over the map in very fitting scenarios. Look around ATMs, financial institutions, wealthy neighborhoods and a few other places you would encounter private security presence. Moreover, there's a new large Gruppe Sechs depot in Mission Row and a small Bobcat Security office in Del Perro Plaza.

REQUIREMENTS:

- **Gameconfig by Dilapidated:**

<https://www.gta5-mods.com/misc/gameconfig-xml-dilapidated>

OR

- **Gameconfig for Limitless Add-On Vehicles by F7YO:**

<https://www.gta5-mods.com/misc/gta-5-gameconfig-300-cars>

- **Packfile Limit Adjuster by Unknown Modder:**

<https://www.gta5-mods.com/tools/packfile-limit-adjuster>

- **HeapAdjuster by Dilapidated:**

<https://www.gta5-mods.com/tools/heapadjuster>

- **SirenSetting Limit Adjuster by cp702:**

<https://www.gta5-mods.com/scripts/sirensetting-limit-adjuster>

- **FwBoxStreamerVariable and Decals Limit Patch by Tanuki:**

<https://www.gta5-mods.com/tools/ymap-load-list-extent-limit-fix-fwboxstreamervariable-patch>

INSTRUCTIONS:

- **Run OpenIV, click on “Edit Mode” and make sure you have installed one of the modified *gameconfig.xml* listed above in case you do not have any previously installed. This way your game will be able to handle add-on vehicles properly and it will not crash during loading;**
- **Run the “security” OIV package installer to automatically register the *.meta* changes to the base game files and wait until the process is done;**
- **After following these steps, launch the game and enjoy.**

CHANGELOG:

- 1.0** – Initial release.
- 1.1** – Fixed the Dilettante and improved the vehicles.meta.
- 1.2** – Added glass shards for all vehicles, improved several vehicles and the vehicles.meta.
- 1.3** – Improved several vehicle models, including meta edits, liveries and the Gruppe Sechs Buffalo has been replaced by the S version.
- 2.0** – Added one more security company with three vehicles and two peds, improved the metas and vehicle models and the Gruppe Sechs Dilettante is now considered as an add-on car.
- 3.0** – Overhauled the entire pack with new concepts, designs, vehicles and peds.

- 4.0** – Vehicles, textures and peds improved and revamped, new vehicles added, new interior props, fleet adjustments, cargens tweaked.
- 4.1** – Fixed a mistake within the soundbanks of the vehicles and remade the Lock & Load Steed liveries.
- 4.2** – Fixed the incompatibility with the Contract update.
- 5.0** – Large rework on the peds and vehicles, texture polishment, Gruppe Sechs Buffalo S replaced by regular Buffalo and new scenarios added with map alterations integrated into the main DLC.
- 5.1** – New shader for LED light bars, scenario fixes, NPC behavior improvements and minor model and texture adjustments.
- 5.2** – Large rework on the vehicles.
- 5.3** – Fixed the incorrect shader on the Stanier's grille badge, which caused a deformation issue.
- 5.4** – Several scenario updates, minor texture fixes, consistency adjustments and new installation method using the OIV package installer.

CREDITS:

- **Rockstar Games** – Original models
