

CHEVAL SURGE ARRESTER

This is a version of the Surge with the glass roof being replaced by a metal roof, several chrome parts being replaced with plastic, and the vehicle's lights, including the DRLs are completely replaced with low-end looking lights. With all these changes, it is essentially the low-end version of the Surge. The FiveM version is available [here](#).

REQUIREMENTS:

INSTRUCTIONS:

- **Make sure all requirements are installed before starting the setup process.** For example, if you are not using a modified *gameconfig.xml* your game will not be able to handle add-on vehicles properly and it will crash during loading;
- Choose the correspondent mod version to (Legacy or Enhanced) to be installed, click on the OIV Installer folder and run the “surgearrester” OIV package installer, assign the correct directories for the setup and press “Install” to automatically register the *.meta* changes to the base game files. Wait until the process is done.
- After following these steps, launch the game and enjoy!

ALTERNATIVE MANUAL INSTRUCTIONS:

Follow these instructions only if the automatic OIV installation procedures do not work as intended:

- Run OpenIV (Legacy only) or CodeWalker to proceed with the manual steps. Choose the correspondent mod version (Legacy or Enhanced) to be installed, drag the “sp_surgearrester” folder located in Manual Installation to update/x64/dlcpacks/ and **add** the following line to *dlclist.xml* located in update.rpf/common/data then save the file:

```
<Item>dlcpacks:/sp_surgearrester/</Item>
```

ADDITIONAL INSTRUCTIONS:

- If you want to make the car spawn in traffic, go to update.rpf/x64/levels/gta5 and edit the “popgroups.ymt” file, go to “VEH_MID” section and add the following lines below and then save it:

```
<Item>  
<Name>surgearrester</Name>  
<Variations type="NULL"/>  
</Item>
```
