

VANILLA SUV TOW HITCH FIX

This simply adds a tow hitch to two SUV models that were supposed to be able to tow trailers like the vanilla pickups in-game. The included models are: BeeJay XL and Rancher XL. No meta edits are required for this mod, because the vehicles are already set up to tow the trailers, including the Anti-Aircraft trailer.

REQUIREMENTS:

INSTRUCTIONS:

- **Make sure the most recent versions of all requirements are installed before starting the setup process.** For example, if you are not using a modified *gameconfig.xml* your game will not be able to handle add-on vehicles properly and it will crash during loading;
- Choose the correspondent mod version to (Legacy or Enhanced) to be installed, open the OIV Installer folder and run the “towhitchfix” OIV or simply drag and drop the file into the Package Installer and assign the correct directories for the setup. Do not enable “Skip backup” to be able to uninstall the mod at a later time if necessary. Press “Install” to automatically add the new files and register the *.meta* changes to the base game files. Wait until the process is done.
- After following these steps, launch the game and enjoy!

ALTERNATIVE MANUAL INSTRUCTIONS:

Follow these instructions only if the automatic OIV installation procedures do not work as intended:

- Run OpenIV (Legacy only) or CodeWalker to proceed with the manual steps. Choose the correspondent mod version (Legacy or Enhanced) to be installed, drag the “towhitchfix” folder located in Manual Installation to update/x64/dlcpacks/ and **add** the following line to *dlclist.xml* located in update.rpf/common/data then save the file:

```
<Item>dlcpacks:/towhitchfix/</Item>
```

CHANGELOG:

- 1.0 – Initial release
- 1.1 – Remade the mod, removed the Seminole
- 1.2 – Changed the installation method using the OpenIV Package Installer
- 1.3 – Added Enhanced version
