

IMPROVED BRAVADO RUMPO

The mod features an improved version of the Rumpo with more liveries, general improvements and bug fixes. The van now features two side doors and an additional middle brake light. There are basic tuning parts for the van, so the grille and both bumpers can be changed to the plastic ones. The dirt mapping on the rear bumper, clipping front tires and the red tint on the windows has been fixed. There is also a front license plate on the front bumper and two piles of boxes that may appear interchangeably inside the van's interior.

There are livery and color combinations defined on each livery, so each livery will spawn with its appropriate colors on the Rumpo in traffics. The tuning ID used is **789**. The Deludamol Rumpo has also been affected by the mod, it now has permanent plastic grille and bumpers.

- **Choose the correspondent mod version to (Legacy or Enhanced) to be installed, open the OIV Installer folder and run the “improvedrumpo” OIV or simply drag and drop the file into the Package Installer and assign the correct directories for the setup. Do not enable “Skip backup” to be able to uninstall the mod at a later time if necessary. Press “Install” to automatically add the new files and register the .meta changes to the base game files. Wait until the process is done.**
- **After following these steps, launch the game and enjoy!**
