

IMPROVED BOBCAT XL

This mod improves the Bobcat XL by separating multiple permanent parts from the vehicle into becoming separate extras, such as the side steps, sun visor and the bullbar. The vehicle also gets new wheels, making it a proper dually, complete with proper tire skid textures when braking the vehicle.

REQUIREMENTS:

- **Script Hook V by Alexander Blade:**

KNOWN ISSUES/LIMITATIONS:

- Changing the wheels with custom ones at a tuning shop or with a trainer will cause an inconsistency with the tire skid textures.

INSTRUCTIONS:

- **Make sure the most recent versions of all requirements are installed before starting the setup process.** For example, if you are not using a modified *gameconfig.xml* your game will not be able to handle add-on vehicles properly and it will crash during loading;
- Choose the correspondent mod version to (Legacy or Enhanced) to be installed, open the OIV Installer folder and run the “improvedbobcatxl” OIV or simply drag and drop the file into the Package Installer and assign the correct directories for the setup. Do not enable “Skip backup” to be able to uninstall the mod at a later time if necessary. Press “Install” to automatically add the new files and register the *.meta* changes to the base game files. Wait until the process is done.
- After following these steps, launch the game and enjoy!

ALTERNATIVE MANUAL INSTRUCTIONS:

Follow these instructions only if the automatic OIV installation procedures do not work as intended:

- Run OpenIV (Legacy only) or CodeWalker to proceed with the manual steps. Choose the correspondent mod version (Legacy or Enhanced) to be installed, drag the “improvedbobcatxl” folder located in Manual Installation to *update/x64/dlcpacks/* and **add** the following line to *dlclist.xml* located in *update.rpf/common/data* then save the file:

```
<Item>dlcpacks:/improvedbobcatxl/</Item>
```

- Go to *update.rpf/common/data/handling.meta* directory and edit the *handling.meta* file, **replace** these respective entries with the following lines below within the “BOBCATXL” entry and then save it:

```
<strModelFlags>20440010</strModelFlags>
```
