Video Showcase

The video showcase for LSPDFR+ is available [here](#). I recommend watching it to give you a better idea of what LSPDFR+ is about and how to use it.

Installation

Requirements (for up to date version numbers, check download page or readme)

- LSPDFR 0.4 (not included)
- Albo1125.Common 6.6.4.0 or higher (included)
- RAGENativeUI 1.6.3.0 (included)
- RAGEPluginHook 0.51+ (not included)
- A legal copy of GTA V 1.0.1011.1 or higher.

How to install

1. Install above requirements. For details, <http://www.ragepluginhook.net> and <http://www.lspdfr.com>
2. Drag the contents of this download's Grand Theft Auto V folder into your own Grand Theft Auto V folder. Replace/merge all files if prompted.
3. You can edit the settings this plugin uses by changing the .ini file, located in Grand Theft Auto V/Plugins/LSPDFR.
4. Launch GTA V via RAGEPluginHook.exe. LSPDFR+ is automatically started when you go on duty; you MUST NOT (attempt to) load it yourself.
5. You are strongly advised to install Arrest Manager and Traffic Policar by Albo1125 to optimally use LSPDFR+'s features.

If you're typing "LoadPlugin LSPDFR+.dll" into the RPH console, you're doing it wrong. Please read the instructions above carefully.

LSPDFR+ is now open source!

Check out the GitHub repository: <https://github.com/Albo1125/LSPDFRPlus>

Table of Default Controls

These keys are all configurable in the INI file.

Function	Key / Button	Modifier Key / Button
Pursuit Tactics Menu (in vehicle)	Q	LShiftKey
Open Court Menu	F9	None
Open Traffic Stop Menu	E / DPadLeft	None
Issue Ticket/Summons on foot	Q	LShiftKey

New Traffic Stop System

With an entirely new menu for you to enjoy, you now have much greater control over your Traffic Stops!

- Issue commands to the driver, the passengers or all occupants of the vehicle specifically.
- Ask for IDs of all occupants.
- List of speech items that you can select to play at any time.
- Indepth driver questioning that integrates seamlessly with things like the Traffic Policer Alcohol Levels.
- Integrates directly with the offence reporting system.
- Integrates with British Policing Script.

Traffic Stops work in the same way as normal LSPDFR traffic stops. Press Shift when behind a vehicle to pull it over. Walk up to the suspect and press E/DpadRight (configurable in INI file).

Improved Offence Reporting System

LSPDFR+ features a customisable offence reporting system.

- Indepth ticket writing, with the ability to seize a suspect's vehicle at the same time if on a traffic stop and select multiple offences.
- Offence customisation. LSPDFR+ reads offences from all XML files in the **Plugins/LSPDFR+/Offences** folder – feel free to add your own offences or edit the existing ones. You can even create your own XML file with offences with penalties for your local area.
- Ability to write tickets or issue court summons while on foot and not on a traffic stop. This is done using Shift Q by default when near a person.
- Optional penalty points system for drivers. This can be disabled from the INI file.
- Customisable ticket currency (see INI file).

Improved Pursuit Intelligence (LSPDFR 0.3)

With LSPDFR+, backup in LSPDFR 0.3 is no longer a liability; it now adds a fresh sense of realism to your pursuit experience.

- Pursuit Tactics Menu
 - Choose whether you'd like to use Automatic Tactics or manual control.
 - Choose between Safe, Slightly Aggressive and Full-out Aggressive modes.
- Backup now drives a lot more considerately towards other road users (this isn't perfect and never will be. It's a big improvement, however).
- Only the driving of backup units can be altered. Spawning, parking and officers leaving their vehicle are not affected.
- U-Turns on highways are reduced as far as possible. In practice, this means that U-turns, should they still occur, are no longer a major obstruction towards you.
- Backup is no longer automatically added to your pursuit. Instead, control is handed back to you by allowing you full control via the LSPDFR backup menu.
- This can be disabled through the INI file.
- No (significant) performance impact.

By default, Enhanced Pursuit AI is enabled in the INI file. The pursuit tactics menu can be opened by pressing 1 (by default) whilst in a pursuit.

Unfortunately, this no longer works in LSPDFR 0.4 as the developers have completely altered the default pursuit AI.

Statistics Tracking

LSPDFR+ brings an entirely new Statistics Tracking system to the table.

- View the statistics of your officer's career using the Statistics Viewer executable application.
- Third party plugins are able to add their own statistics.
- Statistics are alphabetically sorted by plugin.
- Statistics are securely stored - you can't just edit them to give yourself an esteem boost.

The Statistics Viewer application can be downloaded from the LSPDFR+ download page.

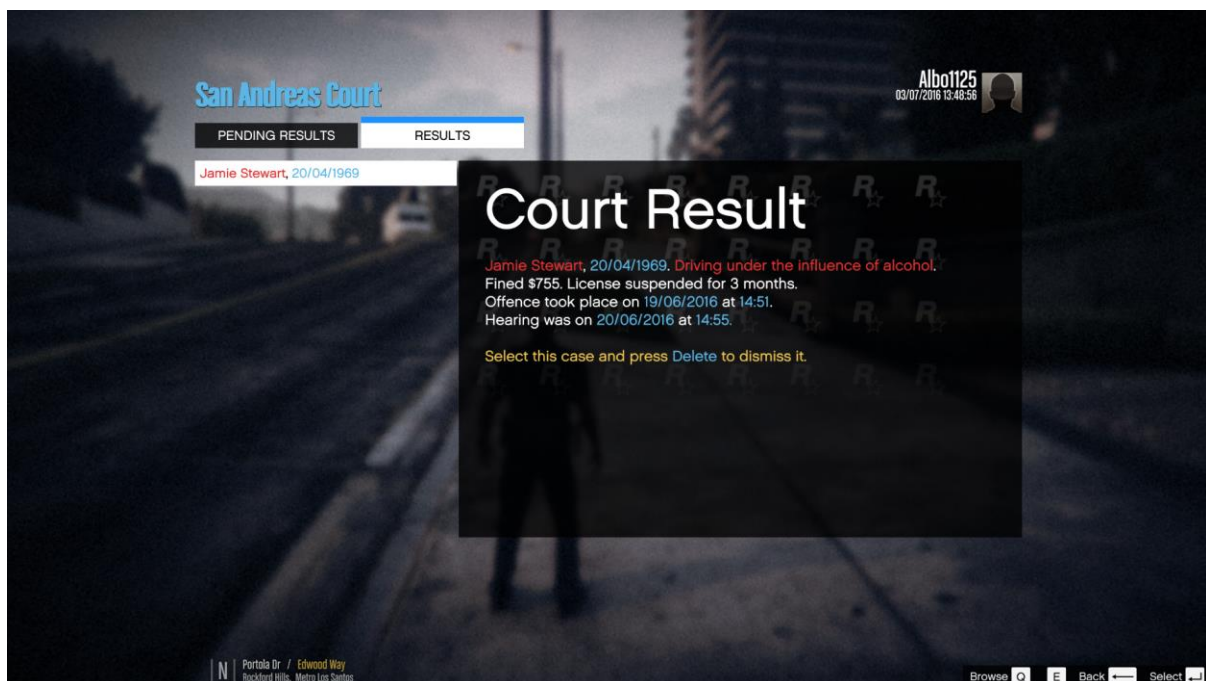

Statistic	Value
LSPDFR+	
Minutes spent on duty	5
Pursuits	3
Times gone on duty	5
Traffic Stops	2
Traffic Policer	
Vehicles Mimicked	1

Court System

LSPDFR+ brings an entirely new Court System to the table!

- See what happens to people you arrest during callouts (if this callout supports LSPDFR+).
- Court Cases persist through playing sessions.
- It may take a (real) day or two for a court case to be heard at court.
- Court Cases are displayed in a clear overview over which you have full control.
- Compatible with Traffic Policer's Breathalyzer and Drugalyzer.
 - If you test someone while they're driving a vehicle and they're over the limit, and you proceed to arrest them, a court case is automatically created.

The Court System menu can be opened by pressing F9 (by default). This is configurable through the INI file.

Indepth API

LSPDFR+ has an extremely detailed API to allow other plugin authors complete flexibility.

- Ability to add custom questions to the Traffic Stop menu.
- Ability to create a new court case.
- Ability to generate sentences for court cases.
- Ability to alter statistics and create custom statistics (verification required).
- Various other powerful features.

A guide to accessing my APIs can be found [here](#).

Powerful Customisation

LSPDFR+ has a detailed INI file to allow customisation.

- Enable or disable certain features at will.
- Set court case dates to be realistic or to be heard within 10 minutes of the offence.
- Pursuit backup behaviour customisation.
- Offence customisation.
- Many other toggleable and editable settings.

Integration with other popular plugins

- Seamlessly integrates with British Policing Script.
 - LSPDFR+ features that conflict with British Policing Script features are automatically disabled.
 - Questions added to LSPDFR+'s Traffic Stop menu are automatically added to British Policing Script's Traffic Stop menu if it's running.
- Seamlessly integrates with Traffic Policar.
 - Drugalyzer and Breathalyzer automatically generate new court cases.
 - Custom Traffic Policar statistics.
 - Vehicle Details implementation.
- Seamlessly integrates with Arrest Manager.
 - On a Traffic Stop, seizing a vehicle is facilitated by Arrest Manager's advanced Tow Truck.
- Also integrates with all other plugins that use LSPDFR+'s API.

Wrapping up

Support

- Watch the installation video for my modifications [here](#).
- Use this tool: <http://www.lcpdfr.com/files/file/9755-lspdfr-troubleshooter-by-albo1125/>
- Read the documentation file if you're having trouble getting a specific feature to work.
- Suggestions can be made [here](#).
- If all else fails: Please leave a comment (not a review) on the LSPDFR+ download page. Include your RAGEPluginHook.log file, located in your Grand Theft Auto V folder. Also, please provide an accurate description of what happened. This allows me to help you as fast as possible.

Show your appreciation

I really enjoy reading positive 5 star reviews posted for my hard work. Please consider doing so if you enjoy LSPDFR+.

Donations are always extremely welcome. You can donate to me here:
