

# Vehicle Ragdoll Mod by MccDev260 v1.1.0

---

## Description:

GTA-V script built with Script Hook V Dot Net API which lets you launch any vehicle you're driving in whichever direction you want at insane speeds!

---

## Requirements:

- Grand Theft Auto V (PC)
  - ScriptHookV
  - ScriptHookVDotNet
- 

## Installation:

1. Go to your GTA V folder.
  2. Copy both the VehicleRagdoll.dll and .ini file into your scripts folder.
- 

## Default Keybinding:

**Num Pad 7:** Toggle Activating / Deactivating script.

**Num Pad 8:** Accelerate at the speed of yeet.

**Num Pad 2:** Reverse at Mach 10.

**Num Pad 4:** Propel to the left.

**Num Pad 6:** Go very fast right.

**Num Pad 9:** Launch into the stratosphere.

**Num Pad 3:** Slam into the ground.

---

## Editing script settings:

Use the .ini file to edit the keybindings and force applied to the vehicle!

*You can find the source code on my GitHub [here](#)*

---

## Changelog:

- v1.1.0: Fixed failure to compile due to GTA.UI.Notification error, Released script is now .dll, Added .ini file to configure settings.

- v1.0.1: Added temporary fix in README for script not compiling for some people due to GTA.UI.Notification couldn't be found.
- 

## Licence:

Feel free to use and edit how ever you would like. If you publish anything using this script as a base or reference, please credit!
