

Default Controls and Reference | ELS-V (1.05)

Beware of key conflicts with GTAV game controls and/or other script modifications, especially trainers. When possible, it is recommended that trainer keys be disabled while operating this modification. Remember: most ELS control keys can be remapped via the CONTROL section in the ELS.ini file. Consult the keyboard key ID chart on the next page for proper replacement values.

A * indicates that the key or combo requires that the ELS Information Display Panel be active in order to have any effect.

KEYBOARD	ELS.INI REFERENCE	EFFECT
J	Toggle_LSTG	Change lighting stage (LSTG). Functionality will vary according to LSTG activation type in vehicle configuration file.
