

## Extra lore-friendly liveries by AlexanderLB for Walter's Overhauled Trains

<https://imgur.com/a/tZATq>

This mod adds 15 new lore-friendly liveries along streak, streak42, streakcoaster, streakc and streakcab from Overhauled Trains pack. This pack adds D-RAIL (12 textures) and Los Santos Transit (3 textures) for the trains and wagons stated above based on many paintjobs from Amtrak and Caltrain compositions while still fitting the game lore.

These “new trains” are added, not replaced and they are set to work and spawn parallel to Walter’s new GO Loco and Brown Streak units. Now the people of San Andreas have more means and variety to travel around state. Instructions for installation are located below.

### MANDATORY MOD (IT MUST BE INSTALLED FIRST):

- **Overhauled Trains by Walter:**
